Chandu D

Java Full Stack Developer Intern
Bengaluru, Karnataka, India

Summary

Holding a Master's degree in Computer Applications, with hands-on experience in Java, Python, full-stack development using the MERN stack (React, Node.js, Express, MongoDB), cloud computing, and IoT systems, I bring strong analytical thinking and collaborative skills to full-stack development roles. I am committed to continuous learning, leadership growth, and contributing effectively within development teams.

Experience

Infosys Springboard

Java Full Stack Developer Intern

February 2026 - Present (3 months)

India

Working on full-stack web application development using Java, Spring Boot, React.js, and MySQL.

- * Developing RESTful APIs and integrating frontend with backend services
- * Implementing authentication, CRUD operations, and database connectivity
- * Following MVC architecture and best coding practices
- * Collaborating on real-world project development and deployment

Excelerate

Mobile App Development Intern (Flutter)

January 2026 - February 2026 (2 months)

India

As a Flutter Developer Intern, I developed cross-platform mobile applications using Dart and the Flutter framework. I gained hands-on experience in building responsive UI components, managing state, structuring scalable app architecture, and understanding how to create modern mobile applications from scratch.

Key learnings and contributions,

- Developed mobile app features using Dart and Flutter widgets.
- Implemented clean UI/UX design principles for responsive layouts.

- Understood state management and application flow.
- Worked in a virtual collaborative environment with international interns.
- Adjusted to different time zones and coordinated effectively with global teams.
- Improved my communication skills while overcoming language barriers.
- Learned teamwork, task management, and how to meet deadlines.

One of the most valuable parts of this internship was collaborating with entirely new and international team members. Working across different time zones and cultures helped me improve my communication skills, adaptability, and professional coordination in a global setting.

AIMS Institutes

Intern – Full Stack & IoT Developer

July 2025 - November 2025 (5 months)

Bengaluru, Karnataka, India

Worked on an internship project titled AutoVolt – Smart IoT Classroom Automation, focused on designing and deploying a real-time automation system. Developed a full-stack web dashboard to control classroom lights, fans, and electrical devices using ESP32 microcontrollers and MQTT communication. Integrated frontend and backend services using React.js and Node.js for real-time monitoring and control. The project involved real-world case implementation, alpha testing, and technical review, and was approved as deployment-ready by the institute's technical committee. Gained hands-on experience in full-stack development, IoT systems, cloud-ready architecture, and collaborative project execution.

UptoSkills

Cloud Computing Intern

February 2025 - May 2025 (4 months)

remote

- Collaborated on cloud computing projects focusing on compute, storage, networking, and security.
- Gained hands-on experience with AWS services, automation, and serverless technologies.
- Enhanced understanding of cloud architecture and best practices, contributing to improved deployment workflows.

TECH MINDSPARC INNOVATIONS

7 months

Intern Cloud Computing

September 2024 - December 2024 (4 months)

Remote

- Participated in guided training sessions and hands-on labs focused on cloud computing fundamentals and deployment concepts.
- Learned the basics of multi-cloud environments using AWS, Azure, and GCP through supervised practice and demonstrations.
- Assisted in simple cloud setup tasks and observed backend service integration under mentor guidance.
- Gained introductory exposure to DevOps concepts, including deployment workflows and basic monitoring practices.
- Understood cloud resource usage concepts, including cost awareness and performance considerations, through case studies and examples.
- Documented learning outcomes and configurations as part of internship coursework and evaluations.

Intern AI/ML

June 2024 - September 2024 (4 months)

Remote

- Developed and trained machine learning models using Python, Scikit-learn, and TensorFlow.
- Engaged in supervised and unsupervised learning methods, including classification and clustering.
- Enhanced data quality through cleaning, preparation, and feature engineering.
- Collaborated with a mentor on mini-projects, significantly boosting practical AI/ML skills.

Education

AIMS Institutes

Master of Computer Applications - MCA, Computer Programming · (November 2023 - November 2025)

NAGARJUN COLLEGE OF MANAGEMENT STUDIES

Bachelor of Science - BSc, EMCs · (2018 - 2021)
